

Glenorchy waste-water system ... Are you aware of the debate?

QLDC has plans to upgrade our town onto a reticulated sewer system

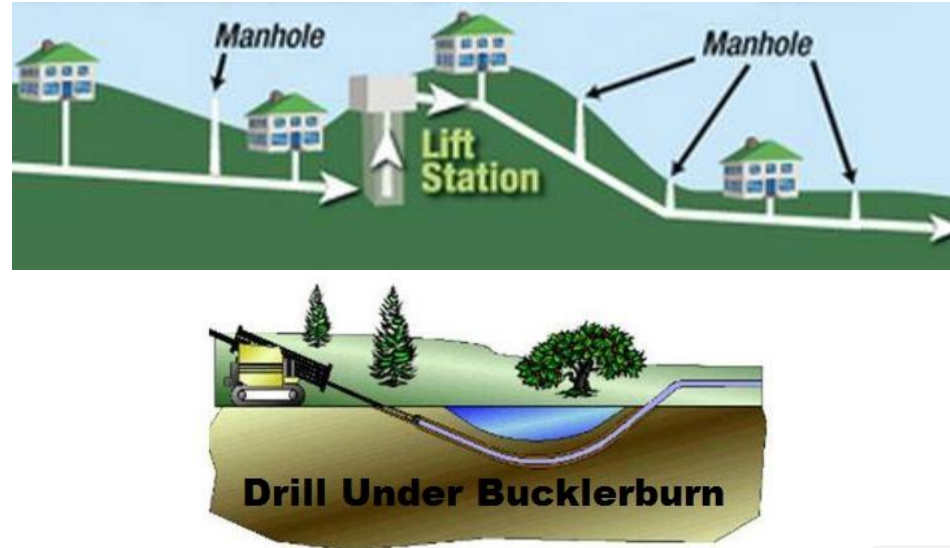

Our debate is not about whether this should or shouldn't happen, it's about the design options for the system and how much it will cost!

THIS IS WHAT THEY WANT YOU TO HAVE

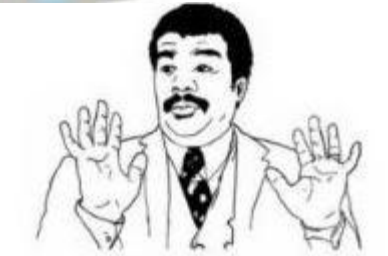

All septic tanks decommissioned – new or old!

\$6 + Million

Larger Treatment Plant – Solids and Liquids!

NOT MY PROBLEM...

WE THINK THIS IS MORE SUSTAINABLE ECONOMICALLY AND ENVIRONMENTALLY

Some septic tanks decommissioned (upgraded)

Smaller Pipes needed

\$4.5 Million

Smaller Treatment Plant – Only Liquids!

Both Options have advantages, but so far we are not being offered a choice on options. It's your money... shouldn't you get to choose?

We need open and informed debate
