

Head of the Lake: Glenorchy community adaptation

We'd like to chat with you about the natural hazards in the head of Lake Wakatipu area.

When: Friday 4 December 2020, any time between 2-7pm
(pop in whenever you're free)

Where: Glenorchy Town Hall, Mull St

Experts from Tonkin and Taylor, and representatives from ORC and QLDC will be there to answer your questions.

Bring your photos of how the area has been affected by events like storms and flooding, and how the river channels and deltas have changed over the years. This will help us paint a picture of the natural hazards in the area.

See you on 4 December!

If you have any questions please contact Tim van Woerden, ORC's Natural Hazards Analyst, on tim.vanwoerden@orc.govt.nz or 0800 474 082.
