

A Gentle Exploration of the Whenua

Join us for a soft, personal wander through the whenua and the unfolding story of BROOMHILL — how this land called us, how we've been listening, and how the garden systems, microclimates, and guild-life are slowly revealing themselves.

As we walk, we'll notice how different plants support one another, how water and wind move across the hillside, and what the land teaches us about resilience, cooperation, and quiet reciprocity.

This is an invitation to sense into the deeper vision of BROOMHILL's educational pathway — to ask questions, understand the living template we are creating, and receive the subtle wisdom the land offers at this turning point of the year. You may also receive seeds: small carriers of potential to nurture your own growth and intentions.

A soft, heart-led wander.

Nothing to achieve.

Simply an opportunity to connect, learn, and be with the whenua.

Guided tour/ 1h starts at 2pm
