

Glenorchy School

Glenorchy School has joined a Community of Learning with the other schools in the Wakatipu Basin.

The staff for professional development this year (among other things) is looking to investigate New Pedagogy of Deeper Learning – through CORE education. This is about how to ensure we are providing an environment and access to what the students need for our world in the future and how we need to change schools and our pedagogy to meet this need. There is significant cost to this and so negotiations are still underway.

There will be an information evening about the Community of Learning on the 22nd February.

The Wakatipu Community of Learning has secured the rights to screen the movie

' Most likely to Succeed'

Thursday 17th February - Venue yet to be arranged.

'The current educational system in the United States was developed a century ago during the rise of the industrial age and was once the envy of the world. However, the world economy has since transformed profoundly, but the US education system has not. Schools are attempting to teach and test skills, when mastered, that still leave graduates woefully unprepared for the 21st Century. After presenting this problem, the documentary focuses on the story of a school in San Diego that is completely rethinking what the experience of going to school looks like. As we follow students, parent and teachers through a truly unorthodox school experience, the audience is forced to consider what sort of educational environment is most likely to succeed in the 21st Century.'

Can't wait to see all the smiling faces and start 2016.
